

I am in favor of doing away with the morse code requirement for amateur radio. I Hold an extra class license (KK5RC 20wpm code) and have found it extremely hard to get my family and friends to study code for upgrading. Morse can now be handled by computers and leave our populous free to study technology that is more pertinent to modern Life. Please follow the Coast Guard's example and remove the morse code requirement from amateur radio. Thank you!
